

Project Overview

The Business 40 Improvement Project will determine how improvements will be planned, designed and constructed. The 1.08-mile project from west of 4th Street to east of Church Street will:

- Resurface Business 40 in the project area
- Improve the width of the road to bring it up to current standards
- Remove/reconfigure the exit and entrance ramps
- Extend/improve length of the road between exit and entrance ramps
- Widen existing shoulders; add new shoulders where needed/possible
